Note Title 24/11/2016

EPPUR SI MUOVE) Considerians la funcione

$$f(x) := \begin{cases} 0 & \text{se } x \neq 0 \\ -\frac{1}{x^2} & \text{se } x \neq 0 \end{cases}$$

$$f(x) = e - \frac{2}{x^3} \quad \text{per } x \neq 0$$

Qim 
$$f'(x) = Qim e^{-y^2} - 2y^3 = Qim 2 \frac{y^3}{y - 3+\infty} = 0$$

$$y = \frac{1}{x}$$

$$e^{(\alpha)} = \lim_{\alpha \to \infty} \frac{e^{(\alpha)} - e^{(\alpha)}}{\alpha} = \lim_{\alpha \to \infty} e^{-\frac{1}{\alpha^2}} \cdot \frac{1}{\alpha} = 0$$

Da questi couti segue de 
$$f \in C^1(\mathbb{R})$$

$$e''(x) = e^{-\frac{1}{x^2}} + e^{-\frac{1}{x^2}} - e^{-\frac{1}{x^2}} = -e^{-\frac{1}{x^2}} - e^{-\frac{1}{x^2}}$$

$$-\frac{12}{3} \quad 0 \quad \sqrt{\frac{2}{3}} \qquad = e^{-\frac{1}{2}} \quad (4-6\times^2)$$
